Harbor Economic Impact Model

*What is the value of your harbor?
What is the value of adding a slip?*

*The Harbor Economic Impact Model
can answer those questions and
many more.*

Download
the latest version from
www.harbormodel.com
for an improved model
interface!

The Harbor Economic Impact Model assesses the local and regional economic impacts of harbors in Alaska, based on information about your harbor, community, and regional fleet. The model features a graphical interface as a front-end to a Microsoft Excel spreadsheet. Northern Economics, Inc. developed the model with funding from the State of Alaska's Department of Transportation and Public Facilities. It is available free of charge from www.harbormodel.com.
